SiteHatchery

CAPABILITY STATEMENT

Experienced software engineering for public-sector and enterprise systems.

Application modernization, systems integration, and data platform development, delivered by principals with 50+ years of combined engineering experience, including 20+ years building enterprise financial software for public-sector organizations.

Company overview

SiteHatchery delivers custom business applications, integrations, and data systems for public agencies, healthcare, nonprofits, and commercial clients. We are intentionally small and experienced: the engineers who scope the work deliver it, which means lower overhead, faster ramp-up, and direct accountability from design through production support.

Core competencies

- **Legacy application modernization:** phased migration from COBOL, C++, and PHP to C#/.NET while systems remain in production
- **Systems integration:** REST API design, enterprise and third-party integrations, scheduled data feeds, ETL, and SSIS data conversions
- **Program & data platforms:** funding and program management, case management, high-frequency data ingestion, alerting, and reporting
- **Enterprise application development:** C#, .NET, ASP.NET MVC, SQL Server, Oracle, PostgreSQL, JavaScript, React, Python
- **AI-enabled workflows:** LLM-assisted document analysis with human review and audit-friendly processing
- **Accessibility, security & O&M:** WCAG 2.1/2.2 AA and Section 508 testing and remediation, VPAT 2.5 reports, security hardening, and long-term operations and maintenance
- **Technical program support:** requirements analysis, Agile/Scrum delivery, testing and UAT coordination, production support

Past performance

COMPANY PROJECTS

- **Transportation program & funding management platform:** used by regional and local transportation agencies for funding programs, contractor and State/Federal-aid invoicing, phase schedules and milestones, project mapping, document libraries, and board reporting; hosted and supported for 10+ years
- **Homeless outreach & case management** (funded by a city police department): client intake, check-ins, encampment tracking, and shelter eligibility status
- **County data application:** scheduled data feeds, reporting tools, and external REST endpoints (Python, PostgreSQL, MongoDB, React)
- **Water data reporting platform:** readings every five minutes from 85 sites, 10+ years of history, with validation, alerts, and reporting
- **Healthcare AI initiative:** Epic-integrated tools that suggest billing codes from discharge summaries for coder review

KEY PERSONNEL EXPERIENCE

- **Public-sector financial ERP** (SunGard Public Sector / Superion, now CentralSquare): development and development leadership of enterprise financial software for public-sector and nonprofit organizations
- **High-volume multi-brand commerce** (national retailer): payments, inventory, fulfillment, and reporting services across platforms serving 200+ retail locations; incremental legacy platform modernization

NAICS codes

541511	Custom Computer Programming Services *(primary)*
541512	Computer Systems Design Services
541519	Other Computer Related Services

Differentiators

- Public-sector domain knowledge from 20+ years building government financial systems
- Principal-led delivery: the principals who scope the work stay accountable through production
- Legacy fluency: we read COBOL and C++ as well as write modern C#
- Long-term production ownership of the systems we build
- Candid build-versus-buy guidance that protects budgets
- Accessibility and quality verified, not assumed, with dated test reports

Technologies

C# / .NET · ASP.NET MVC · SQL Server · Oracle · PostgreSQL · MongoDB · REST APIs · SSIS / ETL · Python · React · GCP · CI/CD · COBOL · Agile / Scrum

Contracting

- Prime on small awards and fixed-price deliverables
- Subcontracting and teaming with prime contractors
- Time & materials and staff augmentation
- Remote delivery nationwide; on site as needed
