Introducing...
JASON AND SITEHATCHERY

✉ jason@sitehatchery.com

📞 530-680-2734

HISTORY

- SiteHatchery started in 2006 on Jason's kitchen table.

- As customers needed a place to discuss projects, Jason began working out of coffee shops.

- SiteHatchery added several employees. It became distracting and impractical to work out of coffee shops, so they rented an office.

- In 2013, Jason was offered a salaried position as Software Engineer Team Lead at local company.

- This led to improving project management, development and accounting processes, and hiring a team of highly-capable contractors. The demand and production levels have remained consistent.

WHERE WILL WE GO FROM HERE?

In the near future, Jason hopes to:

- Devote more time to growing and managing SiteHatchery.

- Free up time to do more ministry—that is, to help people grow in their faith.

OUR FOCUS

Many similar firms focus on:

- Design
- Websites
- Marketing

Our focus is:

- Web-based software
- Websites
- Website Maintenance

TEAM

Our team is composed of various contractors, each specializing in a particular area: development, design, content writing, management, etc. Some of us have been working together for several years. We are a power team! You can view their names and pictures at https://www.sitehatchery.com/about-us.

PRIMARY TECHNOLOGIES

php | Laravel | JS | AJAX

Vue | .NET MVC | Razor | HTML5 | CSS3

NOW THE GOOD STUFF...

My wife and I have been married for 19 years
We have 4 kids

- Daughter, 15 years
- Daughter, 12 years
- Adopted daughter, 7 years
- Foster son, 4 years

One secret to a happy marriage: For the last 12 years, I've taken off every Saturday to be with the family.

Hobbies: SEO, fishing, watching Classic Doctor Who
